
COMPANY

iAutomation, a high technology distributor of industrial automation components, has an immediate opening for a **Director, Supply Chain Management** in **North Attleboro, Massachusetts**. iAutomation's product offering includes machine control, motion control, sensing and vision, safety systems, mechanical components and stages. We offer engineered systems and services to provide OEM and end user customers a complete automation solution.

DESCRIPTION

The Director, Supply Chain Management will be responsible for Supply Chain Operations, Inventory and managing activities related to distribution, material procurement, inventory management, vendor/supplier negotiations, contract management and cost.

- Execute a customer intimacy strategy by aligning with customer needs with cross-functional supply chain processes from customer promise, to supply reliability to customer delivery
- Integrate sales demand forecast with past performance data to develop demand forecasts for planning and budgeting
- Develop strategic plans to improve supplier performance in terms of cost, lead time, quality, innovation, sustainability and risks
- Develop and implement supply chain vision, goals, and strategies to support the business objectives.
- Must be able to lead and drive productivity improvements across manufacturing and distribution.
- Establish and implement methods and best practices related to the systems and process that support inventory forecasting, material control, goods replenishment and life-cycle changes.
- Leverage suppliers and negotiate contracts and policies with suppliers.
- Leverage best price and reliable delivery by implementing a lean supply chain management process at all locations.
- Initiate, follow-up and see-through corrective action requests.
- Work with Finance and internal resources and team members across all functions & departments.
- Manage and develop a diverse team to deliver integrated supply chain and logistics solutions.
- Analyze data and real-world facts to uncover and resolve supply chain issues.
- Represent the supply chain and logistics function internally and externally as a solutions partner.
- Other management and leadership tasks as needed.

REQUIREMENTS & ADDITIONAL DETAILS

Requires a Bachelor's degree in Materials Management or relevant field with 10+ years' experience managing Supply Chain, inventory, and developing strategic plans for a manufacturing environment.
