

Position: **Senior Production Planner**

Location: **Franklin, Massachusetts**

#### COMPANY

---

iAutomation, a high technology distributor of industrial automation components, has an immediate opening for a **Senior Production Planner** in **Franklin, Massachusetts**. iAutomation's product offering includes machine control, motion control, sensing and vision, safety systems, mechanical components and stages. We offer engineered systems and services to provide OEM and end user customers a complete automation solution.

#### DESCRIPTION

---

The Senior Production Planner is responsible to:

- Compile and maintain the master production schedule for all manufacturing cells in the operations department.
- Determine delivery confirmation dates for individual work orders using but not limited to, customer request date, material availability, labor capacity, quoted lead time, document availability, and other influencing factors.
- Release work orders to factory in a timely manner such as to achieve committed delivery dates
- Monitor stock levels of finished goods and release work orders to maintain committed stock levels
- Track material availability against released work orders and compile material shortage reports, communicate shortages to Purchasing to affect accurate and achievable delivery confirmations.
- Communicate with cell leaders to determine status of assigned projects, and provide updated confirmation dates

#### REQUIREMENTS & ADDITIONAL DETAILS

---

Prefer a Bachelor's degree in an analytical field and certifications such as American Production and Inventory Control Society (APICS) or Production and Inventory Management (CPIM) and 5+ years' experience as a Production Planner.

- Advanced Microsoft Excel experience
- Experience with NetSuite is a plus.
